## Using Thunderbird (IMAP) with Microsoft Office 365

You can configure your IMAP mail client such as [Thunderbird](#) to access your email on Microsoft Office 365.

## Step-by-step Instructions

How to: [Setup Microsoft 365 with Thunderbird](#)

## Settings

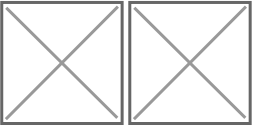

### Server Type: IMAP

- Server name: [outlook.office365.com](https://outlook.office365.com)
- Port: 993
- Connection security: SSL/TLS
- Authentication method: OAuth2
- User name: [ucinetid@ad.uci.edu](mailto:ucinetid@ad.uci.edu)

### Server Type: SMTP

- Server name: [smtp.office365.com](https://smtp.office365.com)
- Port: 587

- Connection security: STARTTLS
- Authentication method: OAuth2
- User name: [ucinetid@ad.uci.edu](mailto:ucinetid@ad.uci.edu)

In the Thunderbird folder list, right click and select "Subscribe" to choose which IMAP folders are shown.
